*“Organizations and Individuals are trying to transform to paperless transactions, but they are still signing lots of physical papers”*

**INDORSE CLOUD** is the world's complete, digital signature, electronic content management, content protection and collaboration software as a service (SaaS). Offering a complete documents workflow that accelerates the digital transformation, making it simple, quick, cost effective and secure to annotate, sign, seal, endorse, protect and collaborate digital documents.

## Features:

- ❖ PKI Based Digital Signature over the Cloud without the need to download the document for signing it digitally.
- ❖ Full responsive Web Application with no Add-ons, Plug-ins, smart cards, USB Tokens and no more drivers to install.
- ❖ High availability with Disaster Recovery.
- ❖ Keys are secured in FIPS 140-1 level 2 cryptographic devices in the Cloud controlled by user's 2 factors authentication Soft Tokens.
- ❖ Content Management, versioning, permissions, folder rules, indexing, document workflow and Email notifications
- ❖ Trusted enrollment of signatures and seals by e-Pen, Touch or Mouse, in vector format, for copy protection.
- ❖ Annotate, Sign, Seal and Endorse by e-Pen, Touch or Mouse
- ❖ Biometric signature verification dynamic & static features as a 3rd factor authentication option.
- ❖ Sign, Seal or Endorse one or many (bulk) documents.
- ❖ Document Protection to encrypt documents with users keys.
